A: Maybe you can use a roundabout way to download the file: Extract it Open cmd Go to "the directory you extracted file" Run: "python" Press Enter That should launch a python shell. You could from there enter any code or read the file, which could be the script file you need to use. If that doesn't work, you could try with the download manager control panel application:

www.getfreehosting.com Hope this helps GE top company as stock to buy in the long term I have always liked GE a lot because it gives me many hope and dreams. Being a company of such a gigantic corporation, GE is so massive that it is almost impossible to comprehend. From the outcome of the stock market to the complete scenario that happened to the company, this will all be covered in this article. Geography Sizes of the production of the various products of GE in a five year period Many people would tell us that they do not want to buy GE, but in this article, I would like to let you know that there are many places that have said that they want to buy GE and hold the stock of the company. In the period of five years since 2003, we can clearly see that the company could help several countries to flourish. Some of the few places that would have benefited from GE are the US, Canada, UK, Russia, Germany, South Korea, and Japan. So, this means that a company that has helped many countries to flourish has been selected by many companies to buy. The production of each product of GE made in a five year period In the period of five years, the production of various products of GE would have increased from around \$10.99 billion to \$17 billion. Although this number is small, one thing is certain; the company would not have been able to survive in the period of five years without being able to diversify. The outlook of the company's finances in the next 10 years As of now, GE's debt is limited and it has passed its financial tests. The peak will not be reached for 10 years, and it is possible that the company will be able to go back to the level of the period before the recession from 2007 onward. Of course, this is not certain and it is possible that the company will collapse
